

Eionet groups and thematic groups

	Eionet groups	Thematic groups
1	Biodiversity and ecosystems 1 – Integration of knowledge for policies	➤ Biodiversity monitoring ➤ Water ➤ Marine/oceans ➤ Forest ecosystems
2	Biodiversity and ecosystems 2 – Cumulative pressures, and solutions	-
3	Climate change mitigation and energy systems	-
4	Climate change impacts, vulnerability and adaptation	-
5	Human health and the environment	➤ Air pollution: air quality and emissions ➤ Noise ➤ Chemicals
6	Circular economy and resource use	➤ Circular economy monitoring ➤ Waste prevention and management ➤ Sustainable production and consumption / key product value chains ➤ Material flows and resource use/efficiency
7	Foresight	-
8	State of Environment	-
9	Food systems	-
10	Land systems	➤ Soil ➤ Land system accounting/analysis data and methods ➤ Support to Copernicus land monitoring
11	Mobility systems	-
12	Data, technologies and digitalisation	➤ Data and data analysis ➤ Data technologies
13	Communications	-
